

SCUBA Replacement 01 (SRP 01)

TECHNICAL SPECIFICATIONS

**NADI
MARINE**
S D N. B H D

DIVING & ROV DIVISION
SPECIALISED IN ALL WITH INTEREST TO DIVER

Our SCUBA replacement (SRP 01) is designed to accommodate high demand of diving works. It is a versatile surface supply system that is used inshore where the system is easy to mobilize, light weight and safer than traditional scuba system.

In certain offshore conditions, SCUBA replacement is a more preferable system to deploy due to its simplicity and smaller footprint compared to full air diving system.

Our SRP 01 is audited based on IMCA D 040

The SCUBA replacement consists of:

- Two-diver air control panel – Sea and Land Technologies SLT 3881
- 150 meters diver umbilicals including comms and CCTV
- Diver's underwater LED light – Outland Technology UWC-325
- Diver's underwater camera – Outland Technology UWL-401
- Band mask – Kirby Morgan KMB 18B
- Two-diver communicator – C-Technics C-Phone 2
- HP compressor – IDE TFI series
- Electrical generator set – Yamaha EF1000iS
- Two-diver camera & light control unit – TRIM System TSCU-1150
- 50L 2-cylinder air quad
